

About

Motivated Computer Science Engineering graduate with a strong grasp of core programming concepts, data structures, and problem-solving techniques. Passionate about applying academic learning and project experience to develop efficient and meaningful software solutions. Seeking an entry-level opportunity in a dynamic organization where I can grow as a software professional, continuously learn new technologies, and contribute to solving real-world challenges through innovation.

Education

G H Raisoni College of Engineering and Management	2026
B.Tech Computer Science Engineering	CGPA: 8.18/10
Atulesh Convent High School	2022
HSC - PCM	70.50%

Skills

- Programming Languages:** C, C++, JavaScript, PHP, Python
- Frontend Development:** HTML5, CSS3, JavaScript, React, Bootstrap
- Backend Development:** PHP, REST API Development
- Database Management:** MySQL, MongoDB
- Tools & Technologies:** Git, GitHub, Visual Studio Code, Sublime Text, Laravel
- Data Structures & Algorithms:** Arrays, Linked Lists, Trees, Graphs
- Soft Skills:** Communication, Problem Solving, Critical Thinking, Team Collaboration

Experience

Upturn India Technologies	Jun 2025 – Dec 2025
Web Development Intern	
- Built and integrated front-end and back-end functionalities for 20+ web applications using modern frameworks, enhancing performance and user experience. - Contributed to live client projects, collaborating with a team to design, develop, and deploy fully functional websites from concept to launch.	

Codtech IT Solutions	Apr 2025 – May 2025
Data Analytics Intern	
- Assisted in data analysis and data visualization during the internship by collecting, cleaning, and organizing datasets to support business decision-making. - Prepared and structured raw data using analytical techniques to identify patterns, trends, and actionable business insights.	

InternPe	Jul 2024 – Aug 2024
Web Development Trainee	
- Learned front-end and back-end web development concepts, tools, and development fundamentals during training. - Built responsive and interactive web pages using HTML, CSS, and JavaScript while improving user interface and functionality.	

Projects

Cross-Domain Recommendation System
- Developed a cross-domain recommendation system enabling movie-to-book and book-to-movie suggestions using statistical methods, similarity mapping, and recommendation algorithms. - Built an AI-powered assistant using Large Language Models (LLMs) to deliver personalized recommendations, natural language interaction, and intelligent query handling. - Designed and implemented a responsive web application frontend using modern technologies, ensuring optimized UI/UX, performance, and a seamless user experience.
VITA Cloud Based Portal
- Developed and deployed a live client website by converting functional requirements into responsive and scalable web solutions. - Implemented front-end interfaces using HTML, CSS, and JavaScript, improving UI/UX and cross-browser compatibility. - Integrated secure payment gateway functionality and optimized workflows to enhance transaction efficiency and user experience.
Transportation & Logistics Platform
- Developed and implemented a Transportation Management System (TMS) with a responsive frontend, enhancing logistics operations and user experience. - Managed import/export processes, including documentation, coordination, and compliance, ensuring efficient cross-border logistics operations. - Designed and optimized supply chain routes using route planning and optimization techniques, improving delivery efficiency and reducing operational costs.

Achievements & Volunteering

- Received **Team Collaborator Award** during the internship for strong teamwork and communication.
- Served as Vice President, Dance Club, leading team coordination and organizing two college fest events.
